EDUCATION

- FAST(NUCES)** 2020-2024
 - Batchelors in Computer Sciences
- FG COLLEGE** 2016-2018
 - HSSC

TECHNICAL SKILLS

- Programming Languages
- Frameworks & Libraries
- Databases
- Game Development
- Web Development
- Software Development
- Tools & Version Control

TOOLS

- Git & GitHub
- Unreal Engine
- Unity
- Visual Studio & VS Code
- Postman (API Testing)
- WordPress
- Netlify (Deployment)
- Docker (for Web-based Applications)

PROFILE

Recent Computer Science graduate with a solid foundation in programming, software development, and mobile game creation. Proficient in C#, PHP, JavaScript, Python, and C++, with hands-on experience building web applications, mobile apps, and interactive games. Passionate about exploring new technologies and developing engaging mobile gaming experiences. A quick learner and collaborative team player, eager to apply my skills in real-world projects and contribute to innovative solutions.

PROJECTS

SERVICE PROVIDER APPLICATION:

Developed a location-based mobile application that connects companies with subcontractors offering relevant services. The platform allows companies to post service requirements, which are then matched in real time with nearby subcontractors. Key features include user authentication, real-time GPS tracking, interactive map integration, service filtering, and an intuitive UI for seamless communication between companies and providers.

BLOOD MANAGMENT SYSTEM:

Designed and developed a system to manage blood donations and requests efficiently. The application enables users to register as donors or recipients, search for blood types, and track availability in real-time, streamlining the donation process and ensuring quick response during emergencies.

KANBAN TASK MANAGMENT SYSTEM:

Implemented Kanban task management to streamline workflow and improve productivity by visually organizing tasks, reducing work-in-progress bottlenecks, and enhancing team collaboration.

PERSONAL SKILLS

- Identifying and solving complex issues effectively.
- Evaluating information logically to make informed decisions.
- Collaborating with others to achieve shared goals.
- Organizing tasks efficiently to meet deadlines
- Adapting quickly to new technologies and workflows.
- Ensuring accuracy and thoroughness in work.
- Communicating ideas and technical concepts clearly.
- Taking initiative and working independently
